

Flu Clinic Protocol 2020-2021

Due to the special circumstances of COVID 19, Flu clinic will look different this year. We have set up a new protocol to ensure your safety. You will enter the office through a separate entrance and not encounter potential sick patients being seen in the office. As always, the room will be disinfected between patients. Due to these changes, we have some guidelines that must be followed.

1. Do not attend flu clinic if you have had a fever in the past 24 hours, if you are currently ill, if you have been exposed to someone with a positive or suspected case of COVID 19, or if you have traveled outside of CT for greater than 24 hours and are required to self-quarantine.
2. Park in the rear of the lot in the designated Flu Clinic Spots
3. Call office at (860) 496-0809 to check in. Please have your insurance information available
4. Staff will instruct you to wait in the tented waiting area or wait in your car until a spot is available in the tent
5. Staff will call you in when the room is ready
6. These appointments are done by our nursing staff and are for flu shots only. We are unable to address any other concerns or give any additional vaccines at these visits. Please schedule a separate appointment if you have other concerns that need to be addressed.
